-----

A country that continues to deal with dire energy shortages, if Tajikistan can continue to attract attention from foreign investors, it can not only build out a crucial sector but ...

The potential for wind is relatively unknown, but CABAR estimates of its energy production are promising, with the forecasted figure standing at 30 billion-100 billion ...

Despite the dominance of hydropower, Tajikistan holds significant potential for the development of solar and wind energy. The country receives an average of about 300 sunny ...

A country that continues to deal with dire energy shortages, if Tajikistan can continue to attract attention from foreign investors, it can ...

Despite the dominance of hydropower, Tajikistan holds significant potential for the development of solar and wind energy. The ...

Chinese developer Eging PV Technology says it will build a 200 MW solar power station in southwestern Tajikistan. The nation will ...

This project allows upstream countries like Tajikistan to expand their energy generation capacity, increase energy exports, and address seasonal energy shortages.

Tajikistan holds vast untapped potential for solar energy. With high solar irradiation, diverse energy needs, and increasing support from government and international partners, solar ...

Tajikistan is one of the most energy-intensive countries in the region. Aging heating systems, poorly insulated
