By pairing a utility-scale solar farm with a large battery system, Togo is positioning itself as a leader in the region's energy sector. This project serves as a vital blueprint for other ...

If you've been tracking renewable energy trends in West Africa, the Togo pumped storage project announcement is like discovering a hidden treasure map.

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include ...

The project, which targets an initial capacity of 55 megawatts (MW), is part of the country's "Mission 300" National Energy Pact. The pact aims for universal electricity access by ...

Togo launches a pilot green energy storage program to boost renewable power and achieve universal electricity access by 2030.

This agreement will finance feasibility studies for a battery energy storage system (BESS) project in Togo - a crucial step to integrate more renewable energy and achieve ...

Announced in Washington during the IMF and World Bank Annual Meetings, the 55 MW project supports the national "Mission 300" plan to achieve universal electricity access ...

The French Development Agency and the Global Energy Alliance Initiative have jointly invested \$200,000 to support a battery energy storage system pilot project in the ...
