Should Tunisia export solar energy?

While only 3 percent of Tunisia's electricity is generated from renewable energy, and the country is struggling to meet its climate objectives because of the prevailing financial crisis, many foreign private investors are actively targeting Tunisian solar resources for export.

Will the Tunisian Sun be exported to Europe?

Exporting the Tunisian sun to Europe has been the ambitious vision of the Tunisian-British company TuNur for the past ten years, as it plans to develop a mega solar power plant in southern Tunisia. This project will, however, inevitably have an impact on local communities and resources.

Can Tunisia export green electricity?

Exploiting its renewable energy potential will also allow Tunisia to export green electricity, including green hydrogen, contributing to the GHG emission targets of the Maghreb and Europe.

Why is solar energy important in Tunisia?

Solar energy also contributes to Tunisia's economic development. Expanding the solar energy sector creates job opportunities in manufacturing, installation, maintenance, and research. It attracts foreign investments, particularly in large-scale solar projects like photovoltaic (PV) farms and concentrated solar power (CSP) plants.

Tunisia is advancing utility-scale solar through a series of tenders, including the latest procurement round launched in January 2023. It previously completed a 500 MW solar ...

Exploiting its renewable energy potential will also allow Tunisia to export green electricity, including green hydrogen, contributing ...

With an average of over 3,000 hours of sunlight annually, Tunisia is ideally positioned to harness solar power to meet its energy demands sustainably. The importance of solar energy in ...

Faced with growing energy dependency, Tunisia is taking a decisive step forward in its commitment to

renewable energy. On December 26, the Ministry of Industry, Mines and ...

In Tunisia, Nur Energie is developing the world's first CSP solar export project between North Africa and Europe. For more information ...

In Tunisia, Nur Energie is developing the world's first CSP solar export project between North Africa and Europe. For more information about the TuNur project please visit ...

Exporting the Tunisian sun to Europe has been the ambitious vision of the Tunisian-British company TuNur for the past ten years, as it plans to develop a mega solar power plant in ...

Explore the powerful investment case for solar module manufacturing in Tunisia. Leverage duty-free EU access, low costs, and a future-proof model.

Tunisia has awarded four new solar power projects to international companies for the production of 500 megawatts of electricity ...

Exploiting its renewable energy potential will also allow Tunisia to export green electricity, including green hydrogen, contributing to the GHG emission targets of the Maghreb ...

Anglo-Tunisian group SoleCrypt announced plans for a 60 MW PV plant in Tozeur, part of a broader initiative to connect eventually to the Medusa submarine cable, enhancing ...

Tunisia's strategic position as a solar export hub to Europe creates compelling manufacturing opportunities. The nation's Plan Solaire Tunisien targets 35% renewable electricity by 2030, ...
