What is a greenhouse?

A growing environment designed specifically for you. A greenhouse is an aluminum-framed structure, glazed with glass or polycarbonate, that is used to propagate and/or grow plants. Solar Innovations® designs and manufactures custom greenhouses to each customer's exacting specifications, no matter the size or purpose.

Why should you choose solar innovations® for Your Greenhouse & Conservatory?

Unlike most greenhouse & conservatory manufacturers, Solar Innovations® provides all the necessary fasteners, silicone, and flashings for your project. These services help customers reduce installation time and cost, providing a high quality final product.

What is a commercial greenhouse?

Commercial greenhouses are built tough to withstand the day-to-day use of floral shops, garden centers and other companies that require an optimal growing environment in any season. They are typically designed with thermally-enhanced framing and utilize insulated low-E glazing that assists in regulating temperatures and light transmission.

What is a residential greenhouse?

Learn more Residential greenhouses are custom-designed to tailor to the homeowner, from the casual grower who wants to propagate young plants to get a head start on the growing season, to the serious gardener who spends much of their time perfecting and tending to their plants' growth.
