The milestone was announced by the Victorian government on Tuesday, which fast-tracked the project through its development facilitation programme. The decision includes ...

Supporting greater renewable integration, the project promises to stabilise the grid and ultimately help lower power costs for Victorian communities. However, the project faces ...

China's Trina Solar has received the green light to build a 500MW/1,000MWh battery energy storage system (BESS) in Victoria, Australia.

The successful deployment of this landmark battery storage system signifies a hopeful shift towards dependable renewable infrastructure, supporting a vision where ...

The 40 megawatt (MW) Brewster wind farm near Beaufort in western Victoria, and the 400MW/1800MWh Baranduda battery energy storage ...

The first battery energy storage project has been approved under the Victorian government's streamlined renewable energy planning process, with the state signing off on a ...

Acciona Energia has lodged an application under Australia's Environment Protection and Biodiversity Conservation (EPBC) Act for the development of a major wind-plus ...

The firm capacity delivered by Victoria's energy storage targets will provide reliable, affordable and clean energy as Victoria's ageing and increasingly unreliable coal ...

Supporting greater renewable integration, the project promises to stabilise the grid and ultimately help lower

Victoria Wind Cooled Energy Storage Project

power costs for ...

The 40 megawatt (MW) Brewster wind farm near Beaufort in western Victoria, and the 400MW/1800MWh Baranduda battery energy storage system (BESS) near Wodonga in the ...

Our modern energy system will be backed by household, neighbourhood and large-scale batteries and new long-duration storage. That's why we have legislated nation-leading ...

The project, named the Nowingi Solar Power Station, is set to combine a high-capacity solar farm with one of the largest battery storage systems proposed in the region, ...
