Discover West Asia's solar potential with Solcast" solar radiation map. Get real-time and forecast irradiance data based on three-dimensional cloud modelling. Powered by satellite data, our ...

China has commissioned the world's largest solar project, a massive 5GW facility in the north-west of the Xinjiang region. The huge ...

The cost of solar energy has decreased rapidly in recent years, offering impetus for these countries to diversify to indigenous low-carbon technologies to enhance energy security and ...

China has commissioned the world's largest solar project, a massive 5GW facility in the north-west of the Xinjiang region. The huge project will cover 200,000 acres, and has been ...

In West Java, Indonesia, the Cirata Reservoir is home to a groundbreaking initiative in renewable energy, the Cirata Floating Photovoltaics (FPV) Project, developed by ...

There are certain roadblocks in the progress of solar PV deployment in ASEAN. This paper aims to investigate the solar PV policies in the ASEAN region over the past ...

In West Java, Indonesia, the Cirata Reservoir is home to a groundbreaking initiative in renewable energy, the Cirata Floating ...

Mining groups in Zimbabwe have teamed up to build a 250MW floating solar system on the world's largest man-made lake, ...

Larsen & Toubro (L& T), an Indian engineering firm, announced a deal to develop two Gigawatt-scale solar power projects in West Asia, which are expected to be valued between ...

Mining groups in Zimbabwe have teamed up to build a 250MW floating solar system on the world's largest man-made lake, Kariba Dam. The facility could be scaled up to ...

Pakistan's solar boom, EV rise, and climate action signal a historic shift from fragility to clean tech leadership across Asia's most unexpected energy frontier.

India, the United States (US), and West Asia are projected to add 100 Gigawatts (GW) of solar capacity by 2025, according to a report by Wood Mackenzie, while China is ...
