What is New York City's largest power plant?

This new electric generating facility in Astoria, is New York City's largest power plant built in more than 25 years. The power plant uses state-of-the-art, natural gas fueled, combined cycle technology to produce 1,000 megawatts of power - enough to supply one million customers.

How many New York homes will be powered by a new energy project?

Once completed, the project will provide enough clean energy to power approximately 600,000 New York homes. "We're growing New York's green economy, building clean energy, and expanding economic opportunities for all New Yorkers," Governor Hochul said.

Will New York get more solar energy by 2030?

The state approved a plan to convert the land into one of the nation's largest battery energy storage systems. Gov. Kathy Hochul wants New York to get the majority of its energy, from clean sources like solar, by 2030.

What is New York State's biggest electricity producer?

It's New York State's biggest electricity producer, providing up to 2.6 million kilowatts of clean electricity. That clean energy is generated by two facilities, the Robert Moses Niagara Power Plant and the Lewiston Pump Generating Plant, with a combined 25 turbines spun by 748,000 gallons of water per second.

If all goes according to plan, the Hecate project, which is expected to be completed in 2030, will be by far the largest site the ...
