-----  
What is vehicle to grid integration?

New York State Energy Research and Development Authority President and CEO Doreen M. Harris said, "Investing in vehicle to grid integration is a game changer for utilities and consumers when it comes to balancing demand on the electric grid and these awarded companies have put forward innovative solutions to improve the way we achieve that balance.

How much money has the governor made for EV charging?

The Governor has also made available \$4 million to advance technologies that overcome data collection, transmission and operational challenges faced by utilities to manage electric vehicle (EV) charging.

Are battery storage costs based on long-term planning models?

Battery storage costs have evolved rapidly over the past several years, necessitating an update to storage cost projections used in long-term planning models and other activities. This work documents the development of these projections, which are based on recent publications of storage costs.

What is a proposal for integrating electric vehicles with the grid?

Proposals are sought from researchers, developers and consultants, who individually or as a team, will develop or demonstrate technologies that can solve the data collection, data transmission and operational challenges faced by utilities when integrating electric vehicles, regardless of supplier, with the electric grid.

While energy storage integration with the grid has been proven technically for numerous cases, using the storage in vehicles for grid support carries unknowns in terms of the impacts on the ...

When your solar system generates more energy than you need, you can store the extra energy with Powerwall and save it for later. Powerwall can ...

When examining the pricing structure associated with energy storage vehicles, battery capacity and the underlying technology play ...

Governor Kathy Hochul today announced \$30 million is now available for consumers to lease or purchase new electric vehicles (EVs) ...

Governor Hochul announced \$3 million has been awarded to three projects to advance technologies that can help integrate electric vehicles efficiently into the electric grid.

NYSERDA is providing incentives that can help accelerate deployment of bulk energy storage projects that provide wholesale market energy, ancillary services, and/or capacity services.

Governor Kathy Hochul today announced \$3 million has been awarded to three projects to advance technologies that can help integrate electric vehicles efficiently into the ...

When your solar system generates more energy than you need, you can store the extra energy with Powerwall and save it for later. Powerwall can also recharge from the grid when utility ...

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...

Governor Kathy Hochul today announced \$30 million is now available for consumers to lease or purchase new electric vehicles (EVs) in New York through the State's ...

When examining the pricing structure associated with energy storage vehicles, battery capacity and the underlying technology play significant roles. The capacity, measured ...

As of December 2025, the average storage system cost in New York is \$1463/kWh. Given a storage system size of 13 kWh, an average storage installation in New ...
