Demand for energy storage continues to escalate, the global battery energy storage (BESS) landscape is poised for significant ...

BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts (247 gigawatt-hours) of battery capacity this year, a 35% increase over 2024 and the highest ...

Demand for energy storage continues to escalate, the global battery energy storage (BESS) landscape is poised for significant installation growth and technological ...

The scene is set for significant energy storage installation growth and technological advancements in 2025. ...

These 10 stories paint a solid picture of what happened in the battery world in 2025--and where it's going next.

The Department of Energy estimates that nearly 19 GW will come online just in 2025 after 10.4 GW were added last year--second in the world after China--although tariff ...

The Department of Energy estimates that nearly 19 GW will come online just in 2025 after 10.4 GW were added last year--second in ...

Globally, annual energy storage deployment (excluding pumped hydropower plants) is set to hit another all-time high at 92 gigawatts (247 gigawatt-hours) in 2025 - 23% ...

Battery industry breakthroughs in 2025 reshaped cost, chemistry, software, and scale, setting a disciplined roadmap toward terawatt maturity.

World Battery Storage in 2025
