In order to access the full UNOPS tender details, request clarifications on the tender, and submit a vendor response to a tender using the system, vendors need to be ...

On 5 May, more than 30 Israeli Air Force aircraft attacked nine Houthi targets using approximately 50 munitions. Among the attack targets was the al-Imran cement factory east of Hodeidah. Reports from Yemen indicated there were dead and wounded at the cement factory. Houthi-linked media reported four people were killed and 42 others were injured. According to an Israeli security source: "We destroyed Hodeidah port and concrete factories that were used for manufacturing ...

17 August Israel bombed an energy infrastructure site near Sanaa which it claimed was being used by the Houthis, in response to continued attacks. Earlier, the Israeli Navy reportedly ...

Our analysts track relevant industries related to the Yemen Electric Generators Market, allowing our clients with actionable intelligence and reliable forecasts tailored to emerging regional needs.

TEHRAN (Tasnim) - A power plant south of the Yemeni capital Sanaa was struck in an Israeli aggression that knocked several generators out of service and sparked fires as ...

It is possible for Yemen to use one of two types of solar power supply: centralized (on-grid) for larger farms or decentralized (off-grid) for small-scale power generation.

Further, the increasing number of power outages due to the demolition of grid infrastructure is increasing the demand for prime-power diesel generators for their daily operations in hospitals ...

The ongoing conflict has significantly worsened the electricity supply situation from an already low level, with severe impact on health, education, water and sanitation, and the private sector, ...

Many power stations and transmission lines in Aden have been largely damaged as a result of the armed conflict and technical neglect. This has led to relatively large portions ...

A source in the Yemeni Civil Defense confirmed that the aggression struck the station's generators, taking them out of service and causing a major power disruption in the ...

Yemen's electricity is heavily dependent on imported diesel and HFO. This is an enormous drain on the budget - yet these fuels are the most expensive (and most polluting) ...
